

I have recently received information about the FCC trying to remove some FM translator stations from the air. Please don't do this. Our local K-Love station is so important in our area. Many people who would not reach out to someone in the community will call in to a station that is not local. I grew up without a Christian radio station and the difference it makes in my children to have the great music is so nice. K-love also brings other concert events to our area that would not normally come here which helps to promote business in our area. Please don't replace these FM stations with LPFM's. Thank you for taking the local interest to heart.
